

**SEPARATIONS & MASS-TRANSFER  
ENGINEERING EXCELLENCE**

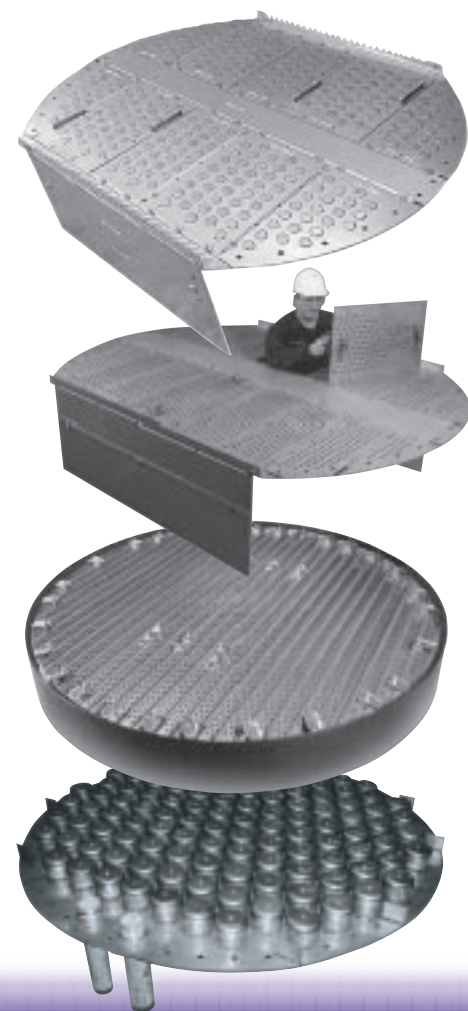

**STRUCTURED PACKING**

- Sheet Metal Structured Packings and New High Capacity Styles
- Wire Gauze
- Wire Mesh
- Liquid Distributors, Supports & Internals

**Fast Replacements, Debottlenecking, & Grass Roots Projects**

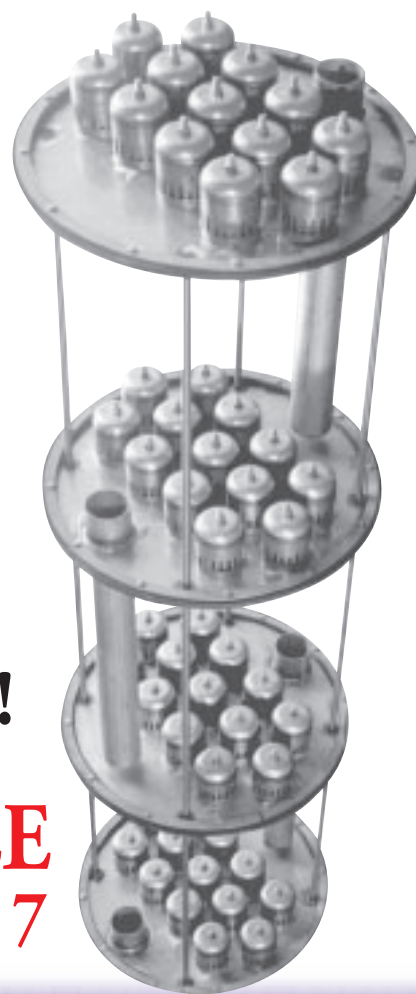

ACS is answering the industry's call for a Customer Service Oriented tower internals vendor.

Your ACS team of experienced managers & engineers – drawn from the shrinking tray-vendor list - offer quality trays, packings, internals, mist eliminators and coalescers - all designed and fabricated in the USA and Mexico.

For prompt delivery of quality trays and mist eliminators at a competitive price...

**Engineered Excellence!**

**Quick Replacement  
Grass Root and Revamp Projects**

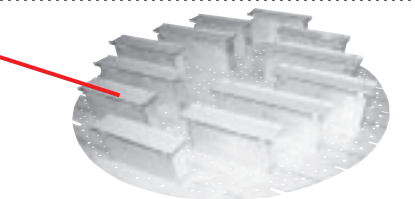

**MIST ELIMINATORS** • ACS is the industry leader with 50+ years of experience engineering and fabricating mist elimination products. Your only source for MisterMesh® mesh pads, MultiPocket™ vanes and AccuFlow™ inlet distributors. ACS offers the quickest replacements of virtually any mesh or CHEVRON mist eliminators with short lead time - stocked inventory from polypropylene to Hastelloy!

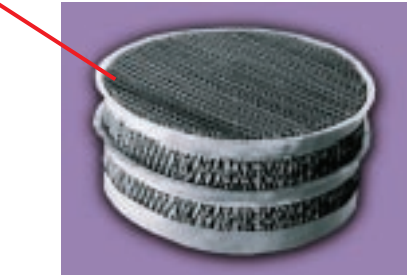

**LIQUID DISTRIBUTORS** • Quality fabrication of high performance and all conventional styles (V-trough, V-notched, tubed, side splash baffles, orifice riser, spray nozzle & pipe lateral feed) for any range of liquid loading. All high performance liquid distributors are performance tested with on-site facilities prior to shipment.

**RANDOM PACKINGS** • Large inventory of stocked random packings including metal slotted rings and saddles. Ceramic and plastic varieties also available upon request. Call us for your emergency needs.

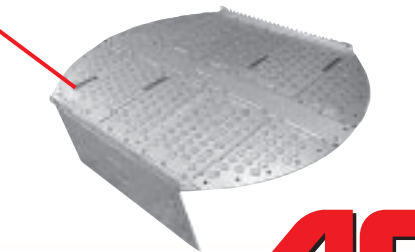

**INTERNALS** • Chimney, transition and liquid drawoff trays, bar grating and multibeam injection packing supports and bed limiters. Broad range of custom internals for distillation, absorption and environmental scrubber columns. ACS fabricates in exotic metals as well as plastics.

**STRUCTURED PACKINGS** • All common crimps of sheet metal structured packings licensed from Montz GmbH (200X, 250Y etc. and high capacity "M" Series). ACS is vertically integrated - stocking, drawing, weaving and crimping its own wire. This makes ACS the most cost effective supplier of quality ACS-BX gauze and Goodloe®-type packings. Ask about our technique allowing for shop installation of packing prior to shipment to eliminate costly field installations!

*Goodloe® is a registered trademark of Metex Corporation.*

**FRACTIONATION TRAYS** - Round, rectangular, fixed, floating and caged valve trays, and, of course, bubble cap, sieve, baffle and rain deck trays. ACS offers a complete line of conventional trays.
